Pearson Bounce App

Pearson Bounce App

Using a cutting-edge technology called augmented reality, Pearson's BouncePages app launches engaging, interactive video animations that bring textbook pages to life. Use your mobile device to snap a picture of the pre-tagged Pearson page, and an animation illustrating the page's concept launches immediately. In addition to these dynamic animations, many of the pages also include hands-on practice opportunities for students to directly apply what they just learned.

Features:

- **Easy to Scan:** Every page has been tested to ensure instant recognition and the immediate launch of the accompanying animation.
- **Engaging, Interactive, and Educational:** The animations include friendly characters, entertaining scenarios, and effective explanations of the material. They allow students to go at their own pace and feature interactive math tools that let students practice what they just learned.
- **Straightforward and Relevant:** The animations and practice opportunities use real-world situations to demonstrate the material in a way that students can easily relate to.

You can download Pearson BouncePages from your Android or Apple store.

TIPS FOR USING BOUNCE PAGE

1. **AIM** the camera so the **FULL** page is easily viewable on your screen. For best results, flatten the page.
2. **TAP** the screen to scan the entire front of the homework page. Scan the **ENTIRE** page. Scanning a single problem will not work. Scan the page **BEFORE** students write on the page.
3. **BOUNCE** the page to life by clicking your BouncePages program icon.
4. Update the operating system on your device and the Bounce Pages app as needed.
