

Monmouth Beach School District

A Tradition of Excellence

November 16, 2020

Dear Monmouth Beach School Community:

Today we were notified of another staff member with a presumptive positive case of COVID-19 as identified by a rapid test. This individual has been asymptomatic. We are currently waiting on the results of a laboratory test for confirmation. School-related contact tracing has been completed and all close contacts have been identified and asked to quarantine. The Monmouth County Regional Health Commission has also been notified.

Because of our launch to a full-virtual model today, no students were identified as close contacts with this individual. A close contact is identified as an individual who is within 6-feet for an accumulated time of 15 minutes or more over a 24-hour period. Therefore, there is no identified risk to the students at this time based on contact-tracing protocols. Tomorrow all staff members will be teaching from home so that our building can be fully sanitized.

Thank you for your continued support and I will update you with further information as it becomes available or changes in anyway.

Sincerely,

Jessica L. Alfone
Superintendent/Principal
Monmouth Beach School
